

# Acoustic Enclosures

**GCS ACOUSTICS** manufacture cost effective modular acoustic enclosures to reduce or eliminate the noise produced by generators, equipment and machinery.

Applications include the enclosure of steam and gas turbines and of noisy machinery in a factory environment. In many cases this noise is a health and safety issue where workers need to be shielded from the plant to protect their hearing.

**GCS ACOUSTICS** enclosures are modular and suitable for indoor and outdoor applications. They can be easily transported to ensure easy site installation.

Enclosures can be provided with fan forced ventilation, hinged or sliding doors, hatches, windows, sealed penetrations and lift-off roof systems all designed to match the modular panel system.

Uniquely **GCS ACOUSTICS** is able to provide the full engineering service including design, drafting, manufacture and installation Australia wide

#### Applications:

- Presses
- Air Compressors
- Generators
- Vacuum Pumps
- Paper Machines
- Granulators
- Printing Presses
- Pumps
- Gas Turbines
- Test rooms
- Screens
- Transformers
